Services Comparison

Services offered by the terminating hospital with that of the Alternate Hospitals comparison.

Justification how enrollees will access the missing service(s) post-termination:

Although no impacted enrollees or utilization have been identified for the ophthalmology service line at the terminating hospital, the Plan maintains an adequate network of contracted ophthalmology providers and facilities within the service area. Should an enrollee require ophthalmology services following the service line closure, the Plan and its contracted provider groups will arrange care through established referral patterns to participating ophthalmology providers and contracted ambulatory surgery centers that continue to offer ophthalmology services. Accordingly, the discontinuation of the ophthalmology service line is not expected to disrupt member access to medically necessary ophthalmology services.
