

Provider Reassignment Chart*

Note: for Terminating Groups that impact enrollees in both Non Narrow Networks and Narrow Networks, a separate Reassignment tab needs to be completed for the different network types.

If the member is assigned at the group level, we provide that information to the DMHC. If the member is assigned to the individual PCP, then we provide the PCP information

Health Plan	Cigna Healthcare
Terminating Provider Group	Optum Care Network-Desert Cities
Block Transfer Filing No.	
Receiving Provider Group	MERCY PHYSICIANS MEDICAL GROUP, INC.-RBO 10243

1. "Enrollees Currently Assigned": Plan should report total number of plan enrollees it currently assigns to each listed PCP.
2. "Resassigned Enrollees": Plan should report only those enrollees being reassigned to a new PCP.
3. "Total New Enrollees": This number should be the total of all three "Resassigned Enrollees" columns. This number should also equal the "total number of enrollees being reassigned" minus "total number of enrollees retaining their PCP" as reported in the original filing.
4. "Total Plan Enrollees with PCP Post-Termination": This number should be the total of "Enrollees Currently Assigned" plus "Total New Enrollees."
5. When reassigning enrollees to new PCPs, distances should be calculated by how far the enrollee must travel from their respective workplace or residence.

Name of PCP (Receiving)	Enrollees Currently Assigned	Reassigned Enrollees Within 15 Miles	Reassigned Enrollees 16 to 30 Miles	Reassigned Enrollees 30+ Miles	Total New Enrollees	Total Plan Enrollment with PCP Post Termination
KALINA MARK E MD	12	2			2	14
