Hello, The Plan is pleased to advise the Department that it has reached an agreement with the University of California regarding the subject provider relationship. As a result, the previously anticipated termination will not occur, and network access to the affected providers will be maintained. Accordingly, the Plan is in the process of mailing the attached communication to impacted members informing them that they may continue receiving care from their current primary care physician and that no action is required on their part. The member communication will clarify that provider participation will remain unchanged and that members may maintain their existing provider relationships without interruption. The Plan appreciates the Department's attention to this matter and will continue to keep the Department apprised of any material developments. Let me know if you have any questions or need anything additional. Thank you, Lea Anna Tonkin

Hi Nune, Please refer to the Plan's response to your inquiry below. a. Identify any waivers or alternate access standards approved by the Department for this area (including the filing number and approval date); There are no waivers or alternate access standards approved by the Department for this area. However, waivers or alternate access standards are not needed. The Plan clarifies that it reassigned 38 enrollees to PCPs that are located beyond the standard 15 mile distance requirement. However, the drive time to these PCPs is approximately 30 minutes, which is consistent with the applicable access standards. At the time the reassignment review was conducted, these PCPs were the only providers available to accept new patients. The Plan confirms that additional PCP alternatives have since become available, allowing members to select PCPs located within the 15 mile and 30 minute access standards. b. The total number of enrollees specified by ZIP Code, if any, who have a residence or workplace beyond 30 minutes or 15 miles of a contracting or plan-operated hospital; The Plan confirms that there are no enrollees who have a residence or workplace beyond 30 minutes or 15 miles of a contracting or plan-operated hospital. All enrollees have access to a contracted or plan operated hospital within 30 minutes or 15 miles. c. The Plan's process for ensuring compliance with Cal. Code Regs., Tit. 28, § 1300.51(d)(H)(ii). (ii) Hospitals. In the case of a full-service plan, all enrollees have a residence or workplace within 30 minutes or 15 miles of a contracting or plan-operated hospital which has a capacity to serve the entire dependent enrollee population based on normal utilization, and, if separate from such hospital, a contracting or plan-operated provider of all emergency health care services. The plan describes its process as follows: (1) Contracts with hospitals to ensure adequate coverage throughout its service areas; (2) performs geo-access analyses to confirm timely access; (3) confirms that contracted hospitals have capacity to serve the dependent enrollee population based on normal utilization; (4) identifies any measures it takes if access isn't available Let me know if you have any additional questions. Thank you, Lea Anna Tonkin
